Member Spotlight (August 2015)

Steve Livingston is our club's
flight training instructor and can
be found at LARKS West field
most Wednesday afternoons.

He is also an AMA Contest
Director, Leader Member, and
holds a fixed wing turbine waiver.

Schedule (w/Daylight Savings)

Flight Instruction

LARKS is now offering flight instruction for
new LARKS members every Wednesday
evening from about 4pm until dark (weather
permitting) at the LARKS West site. This
instruction period is geared towards primary
flight training for members who are new to
the hobby.

You do not need an appointment on
Wednesday--- simply show up. Please try to
have everything ready to go --- plane
assembled, batteries charged, repairs made,
etc.

There is no charge for flight instruction
provided on Wednesday evenings. All that is
required is that you are a Larks Member, an
AMA Member, and complete a Release
Form to give to your instructor prior to your
first flight. Other arrangements may be made
by contacting the instructor with whom you
choose.

Community Involvement

For many years LARKS has had a deep
community involvement. We have been
involved in introducing modeling to
children of all ages, sending children to
camp, doing flying demos at local
schools, churches, and parks. We have
also set up simulators and static
displays at various locations as an
educational experience to our
community. We are always open to new
ideas to promote our hobby to others in
a safe way.

AMA News

No one should fly drones near emergencies

The vast majority of drone users want to fly safely and
responsibly, but may not know these basic guidelines.
That's why the Academy of Model Aeronautics, which
has 176,000 members nationwide and 22,000 in
California, works closely with the FAA and the
unmanned aircraft industry on the Know Before You Fly
campaign to ensure that new flyers have the safety
information they need as soon as they purchase their
drone. Education programs like these will help ensure
the safety of our airspace for all.

Dave Mathewson, executive director, Academy of
Model Aeronautics
